

The **GP series** with its unique design offers complete modularity and maximum comfort. With the GP immersive experience it is inevitable to have stunning performance results. The extraordinary ergonomics are the result of years of development and constant improvement based on the feedback of players and Casino professionals.

The **GP series** is simple and, at the same time, astonishing in its main features where the game of American Roulette has its best value.

**ALWAYS AT THE FOREFRONT WITH DESIGN, THE GAMBEE OFFERS EXTRAVAGANT EXTERNAL COMBINATIONS OF MATERIALS AND COLOURS.**

### A GAMING DEVICE THAT IS COMFORTABLE TO PLAY AND ATTRACTIVELY DESIGNED

With the design focused around the player's needs, the unbeatable, extremely spacious seating with genuine leather finishing, intimate lighting and the stunning simplicity of the software, USB chargers, and additional displays for extra visibility, etc. Its outstanding global performance is due to the greater operator value and players' entertainment that are incorporated in every component of the GP series.

### COMPREHENSIBILITY

The large, 22" wide touch screens are enhanced with a clear, simple graphic user interface that is available in various languages, and includes detailed statistics, easy history access, multi-denominational set-up, etc. With the new platform we are evolving ways to play that significantly boost the Casino's revenues.

### REPORTING - COMPLETE OVERVIEW OF THE GAME

It's easy to understand, instantly recognizable and represents the gaming intelligence with a wide range of versatile information that supports any gaming customer. The data-driven conversion can significantly help casino operators to understand its customers through demographic trends in various markets. As a result of real in-time information new reporting structures enable operators to spend their capital appropriately and execute their business strategies while recognizing the contribution ETGs make to their floor.

### EASILY CONNECTABLE TO ANY EXISTING ON-LINE SYSTEM

Level-up and strengthen the success for operators and consumers with all kinds of available gaming concepts. The GP series is GLI-24 certified and SAS 6.02 compatible. The Gambee machine's build infrastructure enables the ability to penetrate various regions around the world.

### PERFECT VIEW OF THE WHEEL FROM ANY PLAYER POSITION

Designed for the maximum comfort of the players, the GP series is built with exceptional attention to detail. Among the most important things is the perfect view of the wheel from any gaming position. The GP series allows you to connect simultaneously up to 8 wheels and 250 gaming positions and the configuration possibilities are immense.

### HI-END TECHNOLOGY WHEEL

The latest addition to the GP series is a completely revised centre wheel with a truly innovative technological approach, adding colour, intimate lighting to glamorous effects. Using trusted materials over the years of presence on worldwide markets have made these upgrade solutions possible.

- BALL-TRACK
- CUSTOM VENEER OPTIONS
- SECURE AND FAST WINNING NUMBER RECOGNITION
- DATA ANALYTICS AND DIAGNOSTICS
- FAST BETTING OPTIONS

Key to its development is the Gambee game engine with its excellent security-focused monitoring of the rotor status throughout the game plays.

### GAMLINK

Multi-betting system is a brand new concept of electronic roulette playing. It consists of two or more different game generators that are interconnected but still feature stand-alone playing stations. In other words: the GAMLINK multi-betting system allows players to sit at their playing station but still be able to bet simultaneously on several (up to 8) random generators.

### THE GP SERIES HAS PROVEN ITS AGILITY AND CORE-STRENGTH TO SUPPORT LEADING-EDGE OPERATORS ACROSS A VARIETY OF COMPETITIVE MARKETS

#### MEDIA DISTRIBUTION

- integrated software allows live displaying of wheel, game results (latest and past), statistics, promotional information and animation. Display layout is customizable.

#### LUCKY NUMBER JACKPOT

is a progressive game that gives players an additional game on roulette, which makes the whole experience more attractive and exciting. Proven on many markets, this is probably the most effective progressive concept for roulette machines currently available. Fully settable and adjustable, this progressive can make a real difference against competition and will keep your players coming back for more.
